

5 Reasons to Wait for the 2020 MacBook Pro

Description

Should you wait for the 2020 MacBook Pro? This is a question that runs across one's mind each and every day, especially if you love a MacBook. As of now, there's the 13-inch 2020 MacBook but the real wait is for the 16-inch MacBook Pro. One also needs to consider the ARM-based MacBook Pro that is likely being worked on.

Right now, you can buy the MacBook Pro 16 for up to \$300 off at Amazon, B&H Photo and Best Buy. The 2020 MacBook Pro 13 is available at Apple, Amazon and B&H Photo. For other MacBook lovers, the 2020 MacBook Air is the best option as of now. Let's take a look at some of the reasons to wait for the 2020 MacBook Pro.

Wait for Better Processors

If you are looking for a MacBook Pro that processes the videos fast and compresses and decompresses files superbly, you need to wait for the 2020 MacBook Pro. The high end 2020 MacBook Pro comes with a 10th Generation Intel Core i processor.

If you are a MacBook lover looking for more power, then you should wait for the 2020 MacBook Pro that is still to come. While the average day's work may feel the same as the current models, the 2020 MacBook Pro processes videos faster and does a better job of compressing and decompressing files quickly.

The graphics card that comes with these processors is upping the game with a 50% boost in the graphics performance. If you want to switch to the new MacBook Pro, you can find the latest updates

on <https://setapp.com/lifestyle/new-macbook-pro-2020-release-date-and-features>. As a fan, it's understandable that you need the latest info without a wait and this is where the Setapp.com site comes in to help you.

Wait for an ARM MacBook Pro 13

Apple had previously announced to change over to Apple Silicon and custom ARM-based processors. The news doing the rounds is that Apple will release a 2020 MacBook Pro 13.3 with ARM processor in Q4. This is set to see the performance going up by 50-100% in comparison to the currently available models.

That is quite a number and it will definitely make the battery last longer. If you are a MacBook lover looking for more power in a small package, you should consider waiting for the MacBook Pro 13 with an ARM processor.

The wait for 5G

If you are an Internet professional that needs an always-on Internet connection, you should wait to see if Apple adds 5G support to the MacBook Pro. A report claims that Apple is planning for 5G support to the MacBook Pro. Apple is reported to be using some different materials for the antennas to enhance the overall performance and speed. The update will enable you to connect directly to 5G from your MacBook without the aid of a hotspot. If this is a feature you're waiting on, ensure you check out [more information](#) on what 5g is before making the purchase for this reason.

Apple is also reported to be working on 5G for the 2020 iPhone. iPhone fans plan to update their iPhone, but a MacBook next year can get faster and that will be a game-changer in a true sense. If this works out, Apple is expected to charge a premium for the feature and carry to charge for monthly access.

Wait for the MacBook Pro 16

If you are a lover of big displays, then you should consider waiting for the 16-inches MacBook Pro. Apple announced that it would launch the MacBook 16 this year. This is a larger model that will replace the 15-inch completely. The real chances as of now indicate that another Intel-based MacBook Pro 16 will be released this year and then there's, of course, the macOS Big Sur.

Apple has talked about the special event this year on October 13th, which is where we could see a new MacBook Pro. This is, however, a gamble, so if you are not patient enough, you should consider picking a new model when you find a deal at Amazon, Best Buy or B&H Photo.

Wait for better storage options

The new MacBook 2020 is expected to have a larger storage capacity compared to the other MacBooks. The new model is expected to have 8GB RAM and 256GB SSD storage, which is larger. If you are looking for a laptop that has more storage capacity for easily storing your files, then you should

consider waiting for the new MacBook Pro.

This model will allow your apps to run with ease and more quickly. The 256GB SSD will allow you to access your information quickly as it has an access speed of 35 to 100 microseconds. This is nearly 100 times faster.

Conclusion

The new 2020 MacBook Pro is one to wait for since it will have new and improved features that may make you fall in love with the MacBook series. For sure, you will see the value of what you have bought. It's worth it to wait for the new MacBook Pro as it will have awesome features.
