

Looking for a New Career That Yields a High Job Security? Discover 5 Great Options

Description

Many Americans lost their jobs during the Pandemic. Not surprisingly, individuals are updating their resumes or using a resume writing service like <https://www.arcresumes.com/local/illinois/> and looking for employment that provides greater job security. Here's a look at some jobs where workers are and will be in demand.

1. Registered Nurses

The Pandemic made the public think about the need for registered nurses. Indeed, there was a shortage of nurses in many COVID hot spots. Registered nurses make over \$70,000 a year and are needed in many areas of medicine. Many nurses earned more money by traveling to COVID hot spots during the past year. You may be thinking, "I need to look at [aas nursing programs near me](#)." Registered nurses need a bachelor's degree or an associate's degree.

What do registered nurses do? RNs monitor a patient's condition. They manage medication and make sure a physician's orders are followed. They perform medical procedures and chart the patient's progress. An RN can work with many types of patients including pregnant women and those who need hospice care. The main thing a nurse needs is compassion.

2. Software Developers

The internet became even more important during the pandemic. Working virtually became the norm, and employers were looking for new ways to get jobs done. Zoom became more important than ever! Zoom was probably the brainchild of some software developers. Software developers who build computer programs can perform a [host of IT jobs](#). Most developers have a bachelor's degree and earn over \$100,000 per year.

Software developers work on many types of software like system software. This is the software a computer needs to operate. On the other hand, application software is used to perform different tasks. Software developers are competent to handle computer programming and software engineering. As a software developer, it's vital to keep applications safe to avoid security risks so if you are wondering [what is owasp](#), make sure you learn if you are in this field.

3. Home Health Care Aides

The aging population is growing faster than ever before. That's due in part to medical and technological advances. Many older Americans want to age in place. They're staying at home rather than moving into a facility. Home health aides visit patients to perform tasks like changing dressings. In addition, they assist clients with daily living like bathing, getting dressed, and taking medication. It's a rewarding career for many because aides become part of the family. In fact, many aides are hired to simply be a companion. Aides can make more than \$30,000 per year.

4. Veterinarians

During the pandemic, many Americans turned to pets for companionship. Indeed, recent figures show over 60 percent of households have a pet. That's why there's a growing demand for veterinarians. The average viewpoint towards pets has changed. People view pets as [part of the family](#). They're going to take care of their health care needs like a human.

Veterinarians have a doctoral degree and earn over \$100,000 per year. They examine, diagnose and treat animals. Many vets perform surgery and administer medication.

5. Physical Therapist

The aging population may have something to do with the demand for physical therapists. Joint replacements are routine for those who want to maintain their activity level. Physical therapy is ordered by physicians before and after joint replacements. Physical therapists have professional degrees and earn over \$80,000 per year. They are needed in a variety of medical settings, including hospitals and rehab centers.

This is a partial list of jobs that are and will be in demand. Young people should consider studying in one of these areas. Work in a field where you can always find a job.
