What are T-Part Wigs?

T-part wigs are a type of wig with a T-shaped lace at the front. The lace is across your hairline (temple-temple) and down to the middle of your wig in the shape of the letter T.

It has a lace front, but it's too short to give you the versatility a regular [lace frontal wig](#) offers. The wig also has a restricted part lace at either the middle or side of the wig, but it's too small to be termed a lace closure. Stylists only include the lace for parting sake.

You can get T-part wigs in the middle or side part. If you buy it in the mid-part, you can only part it in the middle, and the same applies if you purchase a side-part T-part wig.

There is also such a thing as a 4x4 T-part wig. A 4x4 T-part wig is the "closure" of T-part wigs. The lace is like a "T," but the one at the hairline doesn't extend from temple to temple like a regular T-part wig. Instead, its size is 4x4 inches, like lace closures.

T-part wigs can be human hair or synthetic. However, Luvme Hair only sells human hair T-part wigs, which is the better of the two variants. It looks and feels more natural and gives you more styling options.

Pros and Cons of T-Part Wigs

T-part wigs have benefits and drawbacks, which this section will explain.

Pros

1. It's A Decent Introduction to Lace Wigs

T-part wigs have the attributes of both lace frontals and closures. Therefore, it's a great way to check out what wearing any of those wig types might look like. If you like it (which most likely you would), you can explore other lace wigs. You can drop it if you don't and explore other types.

2. It's Cheap

T-part wigs are cheaper alternatives to both lace frontals and closures. It has a shorter lace, so the construction is less complicated. Therefore, it's a realistic way to get a natural-looking lace wig if you're on a budget.

3. It's Adorable

T-part wigs can be beautiful if you buy them in high quality. They usually have a transparent lace that blends easily with your scalp, giving you natural hair. Their human hair nature also makes it more

beautiful and accentuates your look. The part? It's one of the most realistic you can get on any wig.

Cons

The fact that you can't change the parting area is the main drawback of a T-part wig. If you buy a side or mid-part, you're stuck with it for the rest of the wig's life. It limits your styling and is a turn-off for many.

Another con is that it offers less breathability than other lace wigs. The breathability that comes with lace wigs is the large lace size. You can't compare their breathability since T-part wigs have less lace and more machine-constructed wig caps.
