

Fun and Educational Children's Activity Books by Buzzing Bee Press

Description

Hello, fellow stay-at-home dads.

While not tending to the ever-present kid challenges in and around the house, I create fun & educational activity books for primary and early elementary-aged children. As a former teacher and the father of two youngsters, I started creating activity books in part due to my son's insatiable desire to pencil his way through mazes. Super fun and certainly helped to keep him focused! R.C. has kindly invited me to share my books with you all so that you can have a look and see if any would appeal to your youngsters and help keep them busy over the summer, when not at camps or having sibling squabbles.

Teacher Created
ACTIVITY BOOKS

Editorial Reviews:

★★★★★ "What a darling book! The quality time with an adult, the opportunities for coloring, the challenges of the mazes, and the secret sentence added touch are great!" - Amy L, NetGalley

★★★★★ "I thought this was a really fun book! The mazes are fun for children and I love how it is interactive for the adult and child to do things together." - Kate Z, NetGalley

Offered both as printables and hard copies, our full line of activity books includes maze & connect-the-dots books that are suitable for kids aged 4 and up and scissor skills books that are suitable for children aged 3 -5. Each book is created with a different theme, so along with the skill the child is learning, they are also being introduced to different animals, dinosaurs, holidays, etc. As we approach the summer holidays, our activity books provide a great way for children to continue developing learning skills as they prepare for the next school year.

The full range of books (including **free maze & scissor skills activity packs**) can be viewed at [BuzzingBeePress.com](https://buzzingbeepress.com).
