Perfect Plan for Frosty: A Unique and Imaginative Childrenâ€™s Book

Description

I had the opportunity to have a book created for both of my kids and they both loved seeing their names and faces in their very own book. The entire process is quick and easy, just send in several clear pics of your kids (they make up almost all of my phoneâ€™s picture storage!) and they will get right to work. The story might be the same, but it means so much to each kid as they read through and see themselves, literally, in different careers. Each of my kids just love keeping their book nearby and randomly looking through the pages and I will bet all of the kids in your life would enjoy their custom made book too. Read on to learn more and find where you can have one or ten made for your little ones.

A uniquely personalized book that actually stars your kid

A great way to open up a childâ€™s imagination is by inserting them into their stories. Imagitime uses Artificial Intelligence to illustrate any kid realistically into a storybook using just a few photos. Theyâ€™ve launched their first book â€“ â€œYour Perfect Plan For Frostyâ€•, which is sure to delight children.

Hereâ€™s a brief introduction by Imagitime to this wonderful book.

â€œDetective, Astronaut, Chef, Athlete or something else? What will your kid suggest Frosty to be? Take the child on an adventure where they see themselves in awesome professions trying to inspire a cute polar bear who has the funniest objections to everything. But above all else, let them learn that enjoying their childhood is just as important as dreaming big.â€•

Each book is custom-made to order, offering a unique memento and experience for the children who receive them. It is available in Paperback as well as Hardcover.
