

How to Catch Your Mommy

Description

Hi-Ya! Avery here.

Today I have a very important *How to* for my toddler compadres. Itâ€™s my secret on how to catch your mommy. It sounds easy ~~on paper~~ in text on the computer/tablet/phone screen, but those mommies can certainly be tricky to catch.

Iâ€™m sure youâ€™re eager to learn the way of wise, me, so letâ€™s get to it. First, and most importantly, you must lead them on as if *they* are going to catch *you*.

Make sure you go slow for your mommy so you don't pull too far ahead too fast. Even a little taunting turn will help to keep her thinking she has you.

But then go back straight and pick it up a little.

Find a dead end or barrier that requires you to stop, making your mom think itâ€™s over for sure and sheâ€™ll have you in her grasp soon.

Right as sheâ€™s going in to sweep you off your feet, make a battle cry as you turn around to chase them down. Theyâ€™ll quickly turn the other way in fear.

Chances are, your scary battle cry will pump the adrenaline pretty high, giving your mommy super speed. Donâ€™t let that derail you, sheâ€™ll slow down fast. Remember, *you* are faster!

Soon, youâ€™ll have your prey within reach and will have mommy contained in seconds. Just act quickly to grab andâ€™oh, wait, this isnâ€™t right.

Okay, just go limp if they grab you instead. Trust me, Iâ€™ve done this befâ€¦..noooo, how did she do that?!

Everything is upside down, I have no control!

It's okay, just remain calm and wait for your moment to turn things around on mommy and hold *her* upside down.

Crap, still waiting for the right time. Not finding it.

Ummmm, soooooo, maybe this should be How Not to Catch Your Mommy. Maybe itâ€™s the blood rushing to my head, but Iâ€™m feeling hopeless.

Well, my apprentice peer, letâ€™s just forget this How to tutorial ever happened. We can revisit at a later date, when Iâ€™ve had time to think and recover my dignity. If you are successful in catching your mommy, please send me a text, I could use the pointersâ€™, obviously.
