

Meet The Smartest Baby Monitor: Cocoon Cam

Description

Guest Post from Cocoon Cam

Hi Going Dad Readers!

My name is Siva, and I'm the founder and CEO of [Cocoon Cam](#).

The idea for the company came to me when my daughter Leena was born. After trying out a few of the baby monitors that were available at the time, my wife and I realized that none of them allowed us to both see and hear our little girl while also giving us information about her well-being. I started using my background in hardware and firmware systems to combine all of these things into one product. Working alongside my cofounder Pavan (whose background is Artificial Intelligence, specifically focused in computer vision) it became clear that we were able to use these new technologies to create a totally non-invasive, safe and insightful baby monitoring solution.

Since our launch in February 2017, weâ€™ve helped thousands of families sleep easier and have been awarded 2018 Best Baby Monitor pick from Babylist. Weâ€™re on a mission to use the latest in cutting edge technologies to help make babies safer, and give parents the ultimate peace of mind.

Reasons to Love Cocoon Cam:

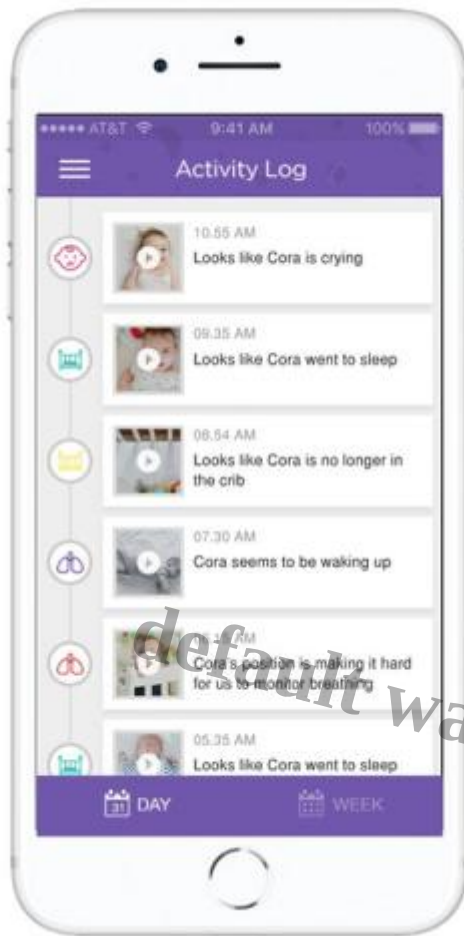

Real-Time Breathing Monitoring:

View a real-time breathing wave overlaid on top of your video feed so you can see and know your baby is breathing.

HD Video & Night Vision: Crystal clear HD live stream video with night vision and zoom capability. Plus, a built-in speaker and microphone so you can hear and talk directly to your baby.

Instant Alerts: Instant alerts let you know when your baby's breathing changes and can even alert you when your baby is starting to wake up, has fallen asleep or is crying.

No Wearables: A completely non-invasive way to monitor your baby's breathing and movements without the need for any wearables, garment attachments or mats.

Validated By Top Pediatricians: Your baby's safety and health are the most important thing to us at Cocoon Cam. That's why we're proud to have Cocoon Cam tested and validated by top pediatricians including IRB-approved studies at UC San Diego and the NICU at Lucile Packard Children's Hospital Stanford.

If you're in the market for a baby camera, check out [Cocoon Cam](#) to help ease anxiety about your baby's sleep safety. It's only \$149.99 with Free Shipping and Free Returns. Plus, try it out risk free for 100-nights!
