

Green Toys Rescue Boat & Helicopter Review and Giveaway

Description

What comes to mind when you hear a name like [Green Toys](#)? When I first heard of the company, I figured the typical eco-friendly manufacturer that only uses a percentage of recycled material to create products. Well, I was wrong!..

[About Us](#)

At its core, Green Toys Inc. has always been an eco-friendly toy company. In fact, we say that to us, “every day is Earth Day.” Our commitment to sustainability and playfulness is part of our DNA and we hope to inspire others to share in this passion.

From our **100% recycled** materials to our **US-based** manufacturing, we’re raising awareness about sustainability while delivering unquestionably safe products. We believe that the best way to encourage environmental change is through goods people buy and use every day—and in our case that’s children’s products.

We care about your kids “how they play, what they play with, and what the future holds. We are constantly exploring and innovating to deliver the best products possible for a playful planet for all.

I love the philosophy that every day is Earth Day, just as it should be. Since I’ve realized just how passionate Green Toys is about their products and who uses them (our kids), we slowly started collecting a few for Avery. With her current love of [all things construction](#), their [construction trucks](#) were an obvious choice. Her first pick was the Cement Mixer (his name is Dizzy), who she only got after being on her best behavior.

Cement Mixer was a hit, and it wasnâ€™t long before we added Dumper to her Green fleet. Then I reached out to Green Toys about working together in exchange for another one of their products. Not

only did they happily agree to send Avery their Scooper (the last one needed complete her Green Toys construction truck set), but also their new [Rescue Boat and Helicopter](#).

Perfect for play on land or in the water, this set offers plenty of imaginative play time. Itâ€™s offers a two-in-one combo with a big yellow helicopter that fits perfectly on the back of a red a light gray rescue boat that floats on water. To operate the machines, Captain Duck and Pilot Bear are included.

Many toys claiming they are great for the water always end up with water stuck inside that never comes out, but not this Rescue Boat & Helicopter. Green Toys designed the boat to open for easy draining and itâ€™s even dishwasher safe. No wonder it won [Dr. Toyâ€™s Best Green Toys Award for 2016](#).

Made in the USA from 100% recycled plastic with no BPA, phthalates, or PVC, I feel confident in giving my daughter a toy thatâ€™s safe and Earth friendly. Even the packaging is made with recycled

materials using soy ink for printing.

Avery loved seeing the new boat and helicopter in the box and she started playing with the set right away. She enjoys the helicopter more than the boat right now. But both the Rescue Boat and Helicopter use her trampoline as a giant landing pad shared by her other Green Toys friends. They all get along well together, probably because Avery formally introduced everyone to each other.

But the helicopter enjoys flying solo every now and then.

Avery plays with her Green Toys more than anything else right now, and I must admit, I enjoy playing with them too. They are simple without too many moving parts that can break or get lost, and best of all, super fun, safe, and open to using imagination. That said, I donâ€™t enjoy them to the point of huggingâ€¦!

How would you like to get your kidsâ€™ arms around a Green Toys Rescue Boat & Helicopter of their own? Thanks to Green Toys, they have allowed me to giveaway one set to one of my readers. All you have to do is follow the instructions below to enter. Good Luck!

[a Rafflecopter giveaway](#)

And maybe, if Avery doesnâ€™t behave, Iâ€™ll add in one of her construction trucks to sweeten the deal.

What?!

Okay, okay, just kidding, Iâ€™d never get rid of these toys.

Phew, youâ€™re silly, Daddy.

Green Toys provided their Scooper and Rescue Boat & Helicopter free of charge in exchange for this post. I was not compensated in any other way and all opinions are 100% my own.
