

LatherMitts â€” Never Use Washcloths On Your Little One Again!

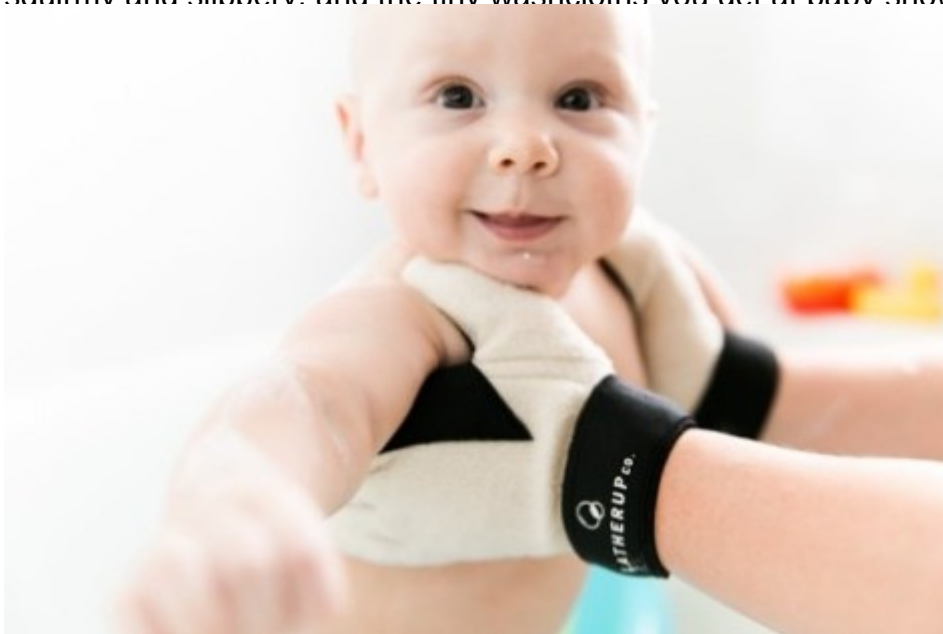

Description

So what are LatherMitts?

Anyone who has given a baby a bath is familiar with how stressful and challenging it can be. They are squirmy and slippery, and the tiny washcloths you get at baby showers just donâ€™t get the job done.

LatherMitts was set out to help moms, dads and all other caregivers with perforated design elements to allow for better grip.

Features include:

- **Safety:** The gentle neoprene grip that lines LatherMittsâ€™ thumb and forefinger ensures that squirmy, slippery kids are secure and safe in your hands. Neoprene, commonly used in wetsuits, is hypoallergenic, non-slip and is naturally resistant to oil, mildew and mold.
- **Quality:** The rest of the glove is made of white organic cotton, perfect for a babyâ€™s sensitive skin. SPOILER ALERT: Bamboo and soy terrycloth will soon be coming to latherup.co for

purchase as well!

- **Dexterity:** The glove design of LatherMitts allows you full use of both hands and all ten fingers, making it easy to get into hard-to-reach places like behind ears and under chins.
- **Value:** LatherMitts can be rewashed and reused again and again the same way you would use a washcloth. Bonus: since LatherMitts require no special care, you can throw them in with your towels.

om, dad or any caregiver can cover

To learn more and pick up your own

pair of LatherMitts, please visit www.latherup.co. You can also stay up-to-date on what LatherUp has been up to and what is next on [Twitter](#), [Facebook](#), and [Instagram](#).
